

# Lineal Services Overview

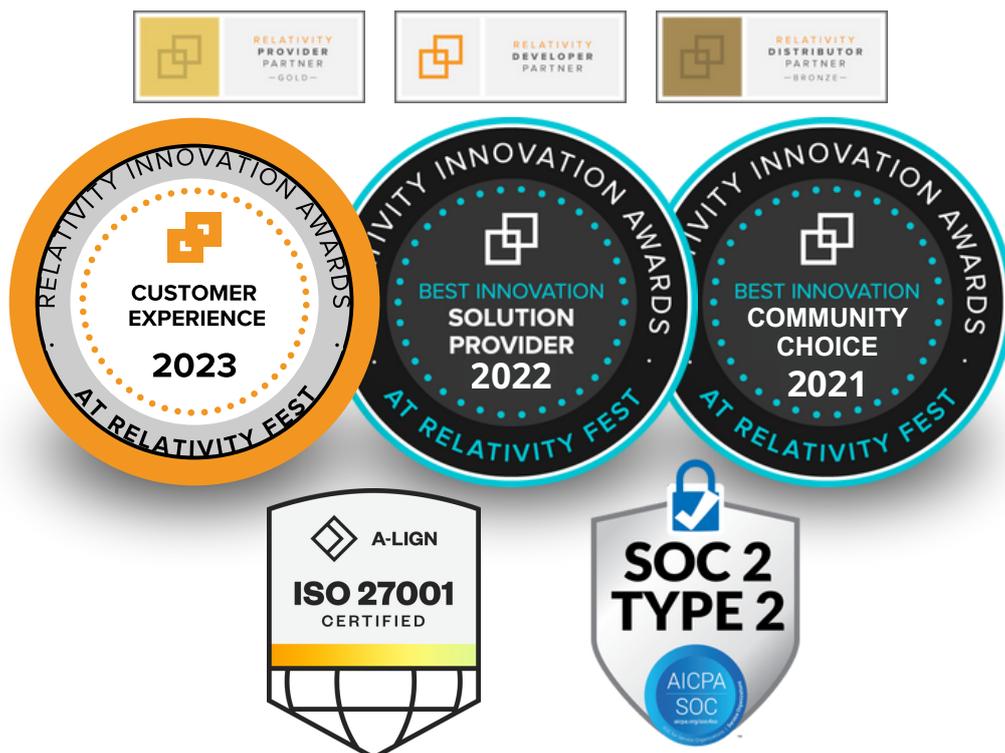

# Company Overview

Lineal is a global legal technology company delivering end-to-end eDiscovery, digital forensics, AI-powered review, and managed services to law firms, corporations, and public bodies. Founded in 2009, we have grown into a trusted partner for high-stakes legal, regulatory, and investigative matters worldwide.

We combine deep legal expertise with advanced technology and operational agility. Our infrastructure spans the US, UK, Europe, UAE, India, Asia-Pacific (APAC), and South America, allowing us to deliver 24/7 project coverage and data residency compliance across multiple jurisdictions.

We are a Relativity Gold Partner and a three-time winner of the Relativity Innovation and Customer Service Awards.

# Forensic Consulting & Compliance

Our forensic consultants partner with clients to navigate complex regulatory, compliance, and eDiscovery challenges. By working closely with our clients we are able to decipher and map complex requirements and provide expert consulting with tailored solutions for each engagement.

We utilise advanced data collection and investigative tools to ensure the secure and GDPR-compliant management of electronically stored information (ESI), providing both remote and on-site capabilities.

# Digital Forensics

Digital forensics has been a core strength of Lineal since our founding. Our global teams are available around the clock to assist our clients with the recovery, investigation, and legal preservation of electronic evidence, whilst ensuring forensically sound and defensible data handling.

## Key Forensic Services:

- Computer and mobile device forensics (iOS/Android)
- Cloud data acquisition and investigation including enterprise applications such as; Microsoft 365, Google Workspace, Slack
- Complex structured data acquisition and analysis including applications such as; Aconex, Asana, Salesforce, Jira and more
- Investigative services including; IP theft investigations, Team defection, Data breach analysis, internal investigations and more
- Large scale data preservation exercises
- Recovery of deleted or corrupted files
- On-site investigations and execution of search orders
- Expert witness and testimony support

We leverage leading technologies, including Cellebrite, Magnet AXIOM, Oxygen, and Opentext (EnCase), and follow strict best practices to ensure the integrity of digital evidence throughout its lifecycle.

# eDiscovery & RelativityOne Hosting

Lineal offers end-to-end eDiscovery services hosted on RelativityOne, with secure infrastructure in the US, UK, France, Germany, UAE, Hong Kong, Singapore, and Brazil.

## RelativityOne Hosting Locations:

- United States
- United Kingdom
- France
- Germany
- United Arab Emirates
- Hong Kong
- Singapore
- Brazil

## Our Services Include:

- Data ingestion, processing, deduplication and filtering (Nuix & Relativity Processing)
- Early Case Assessment (ECA) is conducted in Relativity's Repository workspace using advanced analytics, including concept clustering, communication analysis, and near-duplicate detection, to uncover key insights, reduce data volumes, and inform case strategy prior to review.
- In the Review workspace, we leverage Relativity aiR alongside advanced analytics such as Active Learning, email threading, near-duplicate detection, sentiment analysis, language identification and translation, and custom dashboards to prioritise documents, accelerate review, enhance reviewer consistency, and provide greater visibility into progress and key themes.
- Secure user management, with 24/7 access and monitoring
- Our pricing models are transparent and flexible, ranging from usage-based to fixed-fee and managed service agreements.

# Amplify AI Suite

Amplify is Lineal's proprietary suite of AI tools designed to accelerate and improve the quality of review and analytics inside Relativity.

## Amplify's Core Capabilities Include:

### 1 Time Efficiency

Reduce time spent on review and analysis through automation

### 2 Cost Management

Streamline workflows to lower discovery costs

### 3 Consistency

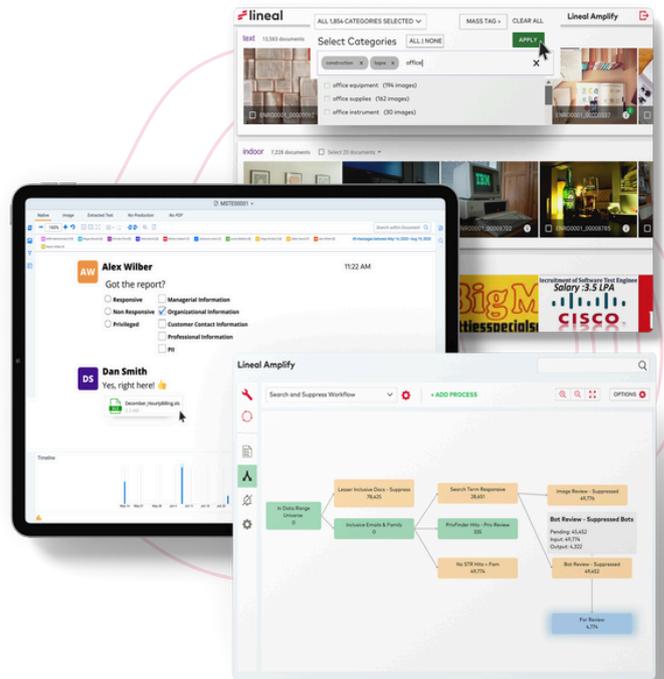

Harmonized review strategies across matters

### 4 Risk Mitigation

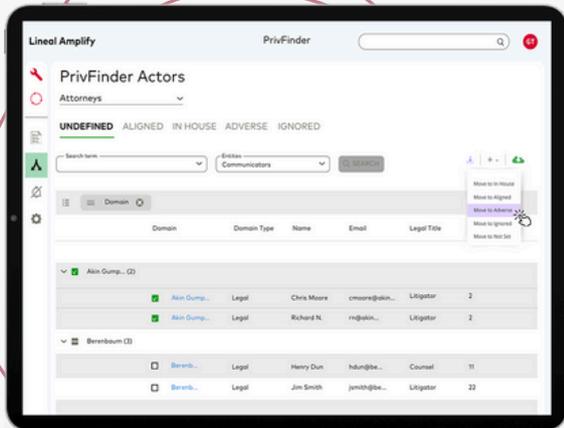

Identify sensitive or privileged documents early

### 5 Adaptability

Configurable workflows for different matter types

# Key Applications:

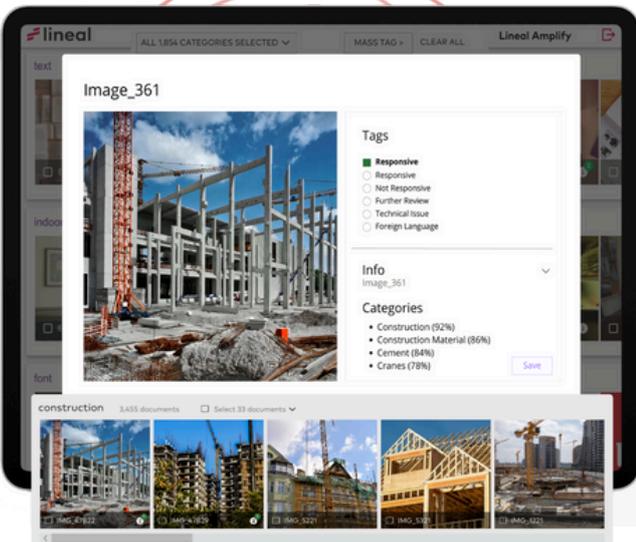

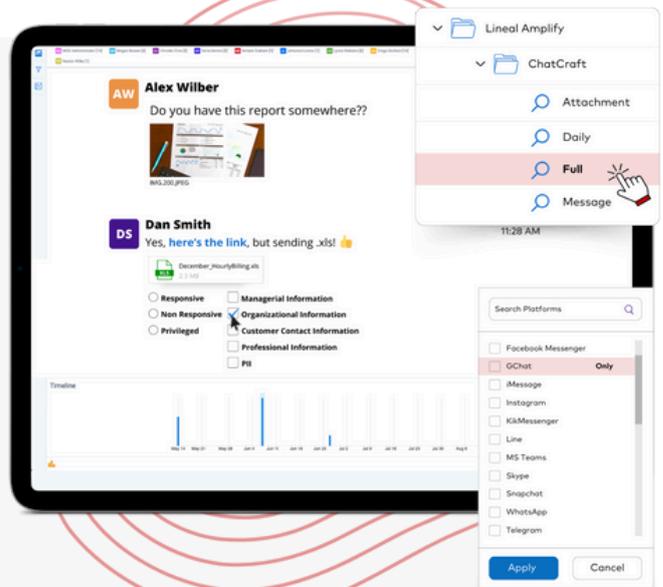

## PrivFinder

Identifies privileged material using taxonomy, analytics & known actor DB

## ChatCraft

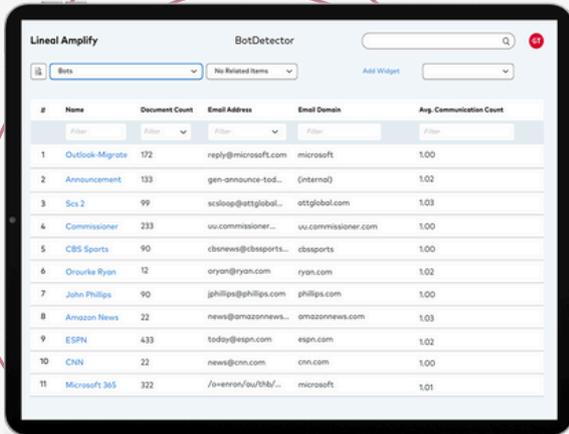

Review and visualize chat data across Teams, Slack, etc.

## Images

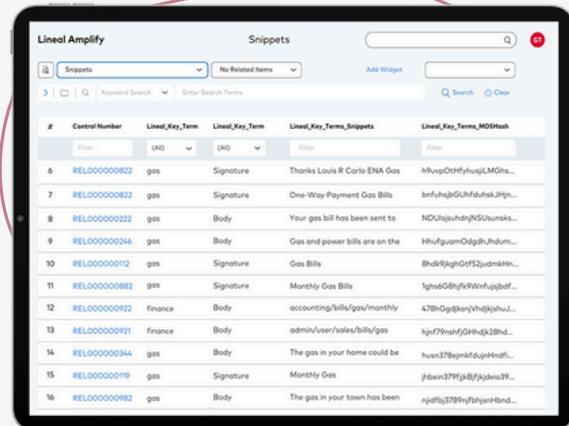

Review and tag image data via AI-powered categorization

# Key Applications:

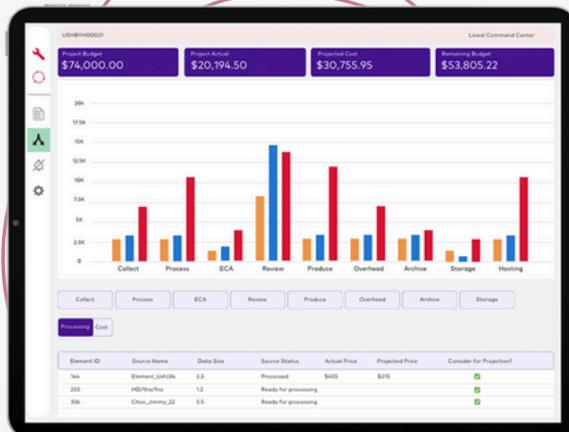

## BotDetector

Filters out system-generated communications

## Snippets

Contextual keyword previews to eliminate false positives

## Workflow / Command Center

Real-time matter tracking, budgeting & templates

# Managed Document Review

We offer scalable managed review services from our operations in the US, UK, EU, UAE, and India.

## Highlights:

- UK-qualified reviewers for sensitive matters
- India-based reviewers for high-volume, cost-effective workflows
- Real-time project dashboards and reporting
- TAR-enabled and linear review support
- Multi-lingual capabilities

All reviewers are trained in Relativity and Lineal workflows and operate in secure environments.

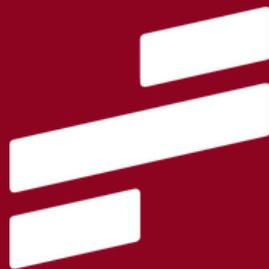

# Technology Stack

Category	Tools / Platforms
Forensics	Cellebrite, Magnet AXIOM, XRY, FTK Imager, EnCase, Oxygen, Purview (O365), X-Ways
Processing	Nuix, Relativity Processing, Integration Points, PowerShell automation
Hosting & Review	RelativityOne (UAE, UK, US), aiR Review, Relativity Analytics
AI & Automation	Amplify Suite: PrivFinder, ChatCraft, BotDetector, Images, Workflow, Snippets, Risk Reports
Security	MFA, Okta, secure review via VPN & jump servers
Reporting	Power BI, Tableau (optional), custom dashboards, production scripts

## Differentiators

- Relativity Gold Partner with global infrastructure (US, UK, Europe, UAE, India, Asia-Pacific (APAC), and South America)
- Proprietary Amplify AI tools integrated into Relativity
- ISO-certified, GDPR-compliant workflows
- 24/7 support across time zones and regions
- Highly experienced in complex, cross-border and multi-lingual matters
- Follow-the-sun service model with pod-based project team structure
