

XRY Pro **First.**

Why XRY Pro?

- 1 Three for the Price of one:** Extract or decode three devices at once all with a single license*.
- 2 Cutting-Edge Access methods:** XRY Pro leverages unique and proprietary access methods, allowing you to extract data from some of the most secure devices even when locked. Whether you're dealing with MediaTek, Qualcomm, Tensor, Exynos, UNISOC, or Kirin chipsets.
- 3 BruteStorm:** Our distributed brute forcing capabilities, exclusive to XRY Pro, significantly reduces the time required for brute forcing complex passwords by utilizing your existing infrastructure.
- 4 RAM Extraction & Analysis:** With support for extracting RAM, XRY Pro enables you to extract and analyze potentially critical evidence.
- 5 Flexibility & Privacy:** XRY Pro licenses are not geo-locked, meaning you can work from anywhere without restrictions. Additionally, our selective extraction feature allows you to extract only the data you need, whether it's based on specific apps, dates, or times—ensuring compliance with privacy regulations.
- 6 In-Tool Scripting Support:** Enhance your extraction capabilities with our in-tool Python scripting support, available at no additional cost. This feature allows you to customize and automate your processes, saving time and resources.
- 7 Offline Capabilities:** No internet connection? No problem. XRY Pro is fully functional offline, ensuring that your extraction capabilities are never compromised.
- 8 Transparent Auditing:** Every action taken with XRY Pro is logged in an extensive audit log, which is fully transparent and easily exportable. This ensures accountability and can be shared with relevant parties when required.

*Excludes when running the Xiaomi Qualcomm Exploit.
