

Oxygen Forensic[®] Detective

Drive investigations forward for maximum productivity.

Streamline your data analysis.

Accelerate case resolution with greater efficiency.

Our flagship solution empowers your investigations with:

- More from the cloud with over 100 supported services.
- Data extractions from over 45,000 app versions.
- Powerful global search capabilities and deep, thorough analysis.
- Cost-effective perpetual licensing.
- 98% satisfaction-rated support and training.

Who we are.

We are a privately held U.S.-based company of practitioners, from the CEO on down, who design and build the best tools for law enforcement, government agencies, organizations, and businesses in more than 150 countries.

Customer story.

I have had the occasion to provide inculpatory evidence on numerous cases, some of which rely solely on the digital evidence obtained from mobile devices. Without Oxygen, the evidence would have never been discovered. I have also conducted up to six extractions at once using the software, which is not possible with other leading software on the market.

Detective Stephen Lipscomb

Concordia Parish Sheriff's Office, Digital Forensics/Cyber Crime Unit, Vidalia, LA

Gain deeper understanding of your investigation with better data extraction from more sources.

Extract from more **Mobile Devices**

Extract data from over 31,000 devices including Apple iOS and Android devices. Advanced support for Android devices based on MTK, UNISOC, Qualcomm, Kirin and Exynos chipsets.

Access and decrypt more from **Cloud Services** than any other tool on the market

Built-in Cloud Extractor supports 100+ cloud services.

Parse and analyze more from **Drones**

Extract and analyze drone images and videos, and telemetry with time stamps and other data.

Extract, decrypt, and analyze more from **Computers**

Find, extract, and decrypt passwords, credentials, system files, and user data from Windows, macOS, or Linux. Brute force passocdes to decrypt computer partitions, apps and files.

Access, extract, and analyze more from popular **IoT Devices**

Data extraction from Amazon Alexa and Google Home apps, from Apple iOS, and Android devices. Plus, Cloud Extractor acquires complete evidence sets including voice recordings on our interface.

Extract more data from **Smartwatches** and **Fitness Apps**

Smartwatch extractions including contacts, calls, messages, multimedia files, and fitness app data from device and cloud services.

Customer story.

[We rely] heavily on Oxygen Forensics cloud connectors to deliver results where other options only offer dead ends.

Joseph Pochron

Former President, TransPerfect Legal Solutions

Improve efficiency and drive your investigation with better analytics.

Time-saving text decoding and extraction with **Optical Character Recognition**

Quickly filter, search and convert words contained in a screenshot or photo to machine-encoded text.

Versatile reporting and analytics with **Statistics** widgets

Data on the device and investigator interaction displays. Assign tags. Mark key evidence.

Dynamic social link connections with built-in **Social Graph** interface

Identify and connect device owner's closest contacts and multi-device social connections.

Built-in **Translation** module

Translate extracted chats into/from 27 languages.

Extend timeline and geographical data searches.

Full section view of events in one list with **Timeline** analytics

View all device events in one list including single or multiple device events.

Better geographical forensics with **Maps** module capabilities

Identify frequently visited places, specify time periods, common locations and animate travel.

Customize powerful data searches with **responsive search** and **keyword analysis**

Create keyword set to search during and after extraction. Search texts, faces, phone numbers, email and IP addresses, geo coordinates, credit card numbers, file hashes including Project VIC search.

Time-saving image and facial data analysis.

Efficient image categorization with **Key Evidence** and **Files** capabilities

Brain-saving sensitive sorting capabilities. Classify images into 20+ categories including pornography, extremism, drugs, alcohol, and weapons. Fine-tune positive "hit" settings.

Streamlined facial categorization and clustering with time-saving **Faces** categorization and analytics

Immediate built-in categorization and face analytics (gender, race, age) of photos or videos in mobile, cloud, or drone extractions.

Cost-effective never-ending right to use licensing.

Realize long-term cost savings and ease resource planning with **perpetual licensing.**

Maintain control over your data with perpetual licensing model.

Expand your knowledge with customer-centric training and support.

Benefit from superior 98% satisfaction-rated **technical support and training.**

Learn from our client-first, highly responsive team with full access to on-demand education.

Our mission.

Bring innovation, solutions, and visibility to digital evidence **to make the world a safer place.**

Our vision.

Revolutionize digital forensics and incident response by empowering people, organizations, and businesses through **innovative solutions that enhance efficiency and transform the way we work and collaborate.**

Customer story.

Immediately, the team were able to identify multiple areas where Oxygen's product was vastly superior to use in a high-pressure, fast-changing environment. This included software stability, ease of use (including the new software to allow analysts to query processed output) and the ability for multiple operators to multi-task the workload.
