DIFFERENTIATORS

PROPRIETARY DARK WEB TECHNOLOGY:

Gain visibility into inaccessible sources and dark web traffic to and from a network, with access to more than a decade of indexed historical data.

INTUITIVE USER INTERFACE:

Our agentless deployment is designed for Government and LEA, allowing for efficient onboarding of personnel.

DARK WEB VIRTUAL MACHINE:

Our on-demand virtual machine is the secure and simple solution for cyber professionals to access the dark web. Threat hunters can effortlessly access the dark web directly from their browser, safe in the knowledge that their identity is protected and malware can't jump to your organization's live network.

SECURE REPLICA OF THE DARK WEB:

Our advanced technology enables cyber investigation teams to conduct safe and secure investigations of live sites, without any need for direct engagement with the live sites.

COMPANY OVERVIEW

Founded in 2017, Searchlight Cyber is a company that specializes in dark web threat intelligence. We provide award-winning dark web investigation and monitoring products to assist US and NATO governments, public sector and law enforcement agencies, and commercial enterprises across the globe with identifying criminal activities and preventing cyberattacks.

CORE CTI CAPABILITIES

With Searchlight Cyber, you get instant visibility into emerging threats through our dark web monitoring tool, DarkIQ, powered by our automated data collection, analysis, and alerting. Cyber teams can also hunt down threat actors, investigate ransomware groups, or illuminate cyber TTPs using our dark web investigation tool, Cerberus.

PROPRIETARY VM & DARK WEB TRAFFIC TECHNOLOGY

Unlock our secure and on-demand dark web virtual machine (VM) and gain visibility into Tor traffic to and from your network.

UNRIVALED DARK WEB DATASET

Our automated data collection gives you access to more than 15 years of live and archived data in our dark web data lake.

INVESTIGATOR TIME-SAVING PLATFORM & SERVICE

Using advanced AI and analytics, Searchlight automatically monitors for threat actors & groups targeting your organization.

HOW WE GATHER OUR DATA

We gather our data from different sources on the deep and dark web, including underground forums, marketplaces, and encrypted chats in accordance with US, UK, and European laws. Our team of threat intelligence experts have extensive experience in law enforcement, cybercrime, and the military. Additionally, we use advanced AI web data collection methods to scrape and process large amounts of data quickly and efficiently – extracting context-rich insights from the data for use by investigators and security teams.

By partnering with us, you'll unlock access to previously unobtainable live activity and over 15 years of archived dark web data.

GAIN THE TACTICAL ADVANTAGE

ADVERSARIES USING THE DARK WEB THINK YOU CAN'T SEE THEM.
WITH SEARCHLIGHT CYBER, YOU CAN.

EXPERIENCE

Our cloud-based Cyber Threat Intelligence (CTI) platform, developed in collaboration with national government and law enforcement agencies, has assisted in numerous dark web criminal investigations in the US and UK since 2017, effectively stopping threats and safeguarding society and personnel.

"This Dark Web scanner is the one to have! This works wonders for our investigation efforts."

"Searchlight Cyber makes our SOC team more efficient in threat hunting and breach investigations."

COMPANY DATA

Searchlight Cyber gives you an operational advantage over threat actors and criminals, providing investigators with visibility into previously clandestine dark web sources, including;

LIVE AND HISTORIC
DATA FROM

850K+

dark web sites

INTEL ON BUYERS, SELLERS,
AND GOODS FROM

110+

dark web marketplaces

AND
