# Replacing Legacy with Cutting-Edge Architecture

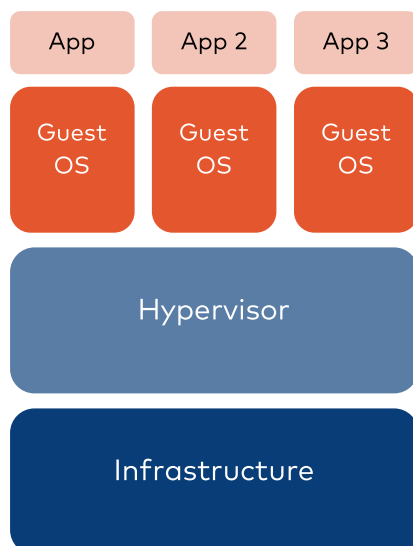

Farsight is aware of your business and IT needs such as low maintenance costs and sane infrastructure requirements. Excessive infrastructure demands and high human resource requirements increase total cost of ownership significantly.

Our container-based platform mitigates both of these challenges allowing deployment in both cloud-native and on-premise environments to accommodate customers with data privacy concerns. Leveraging Kubernetes, we achieve true cluster scalability while significantly reducing TCO for both on-premise and cloud deployments.

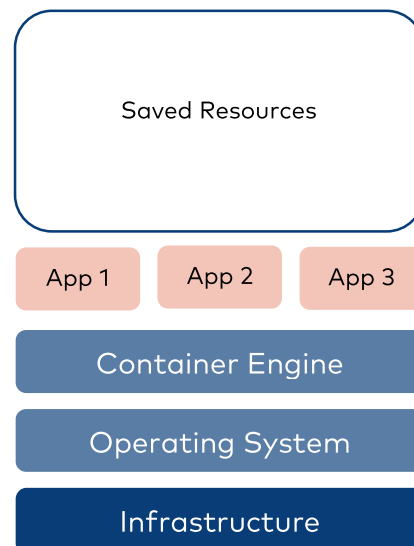

## Farsight Benefits

- No third-party licensing costs
- Easy to deploy in under 1 hour - anywhere
- Decreased maintenance costs by 70% - 80%
- Decreased hardware resource requirements by 60% - 70%
- Self-healing containers for uninterrupted operations
- No downtime for patching and upgrades

### Legacy System (VMs)

### Farsight (Containers)

# License exactly what you need

Traditionally, clients are compelled to license the entire product even if they only utilize a fraction of its functionalities. In many scenarios this is not economically reasonable.

However current platforms are not built on modular architectures. Removing individual components would break the system.

Farsight offers a modular licensing model tailored to client requirements. Available feature packages can be combined to exactly serve your scenario and needs.

Functionality	Farsight Basic	Farsight Advanced	Farsight Max
Processing	Optional	Optional	Optional
Indexing	✓	✓	✓
Searching	✓	✓	✓
Search Statistics	✓	✓	✓
Email Threading		✓	✓
Batching	✓	✓	✓
Review Coding	✓	✓	✓
Redacting	✓	✓	✓
Automated Redactions			✓
Offline Translations		✓	✓
Document Classification		✓	✓
Productions	✓	✓	✓

### Farsight Benefits

- License tailored to your requirements
- No excess infrastructure for unwanted features
- Flexibility to adjust your license any time
- Farsight grows with business demand

# Reducing Complexity giving You back control

Most eDiscovery platforms are not as intuitive as they could be. Essentially none of them are self-explanatory and require frequent intervention by administrators.

The use of mostly older UI-frameworks leads to delays, popup windows and unnecessary full page reloads.

In Farsight, operations are easy to understand and can be executed by end-users without the help of case administrators.

Farsight comes with instant loading speed. Only elements that really change will be refreshed. Filters have an impact on display in real time while typing. Lists and documents load instantly without waiting time.

## Farsight Benefits

- Low entry cost for standard use case scenarios (25 user license Farsight Basic)
- Seamless integration of additional functionality:
  - Processing, Email threading
  - Analytics (offline translation, document classification)
  - Automated Redactions

The screenshot displays the Farsight eDiscovery platform interface. On the left, a document preview shows an email with the subject 'Confidential Client Information'. The main area features a 'First Level Review' panel with fields for 'Item - Control Number' (REL0000017025) and 'Relevancy' (Relevant, Not Relevant, Technical Issue). Below this, a 'Search Term Report' window is open, showing a table of search results. The table has columns for Actions, Term, Hits, Hits Unique, Hits With Relation, Color, and Status. Two search terms are listed: 'oil AND gas' with 563 hits and 'officer docume...' with 2 hits. The interface includes various navigation and control buttons like 'BACK', 'EDIT', 'RUN TERMS', 'CANCEL RUN', and 'DOWNLOAD REPORT'.

Actions	Term	Hits	Hits Unique	Hits With Relation	Color	Status
	oil AND gas	563	563	1394	Yellow	Complete
	'officer docume...	2	2	36	Yellow	Complete

# Key Take Aways

### Deployment

Farsight can be deployed on prem or natively in the cloud. No matter where, you get the same experience. Installation is straight forward and done within hours.

### Modularity

No matter if you are a boutique or enterprise customer, Farsight adapts to your needs. Only license what you need and upgrade later.

### Performance & Resources

Using only modern technology, Farsight performs significantly faster than the competition and at the same time requires only a fraction of the resources.

### Ease of Use

Using a modern UI framework and having the platform designed by actual experts in the field, Farsight is both intuitive and efficient to use.
