User-centric design

Farsight is built by experts in the field of eDiscovery. Thanks to our experience and the use of modern frameworks and , Farsight enables users to search, find and review data with ease.

Usability and proven key features are especially important. With that in mind, Farsight enables users to achieve their goal faster, more intuitively and with less effort than ever before.
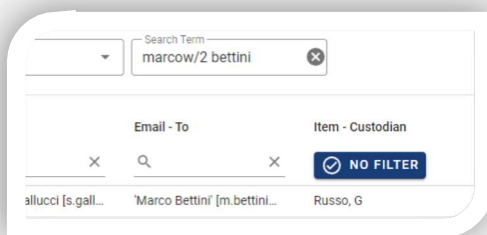

Farsight Features

- Plain and Complex Searches supported
- Filtering based on metadata and custom fields
- Search Term Reports
- Highlights and Redactions
- Flexible Document Tagging
- Collaboration with other team-members
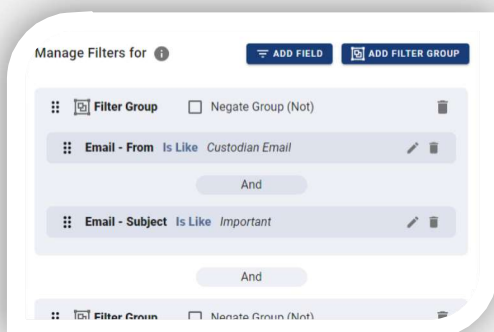

Easy to Use

Intuitive Frontend

Once logged in, you have all the functionality you need right at your fingertips.
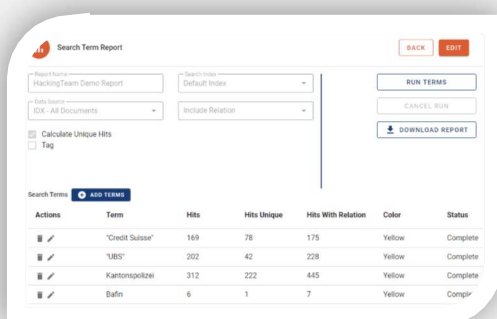

Advanced Searching

Advanced searching allows for simple but also complex searches to refine your result and hone in on important information.
A complete guide to available search options can be provided.

Powerful Filters

Filtering your results by different criteria has never been easier. Simply add your required fields, group them and move them into the desired order. Everything in a visual interface with intuitive drag and drop.
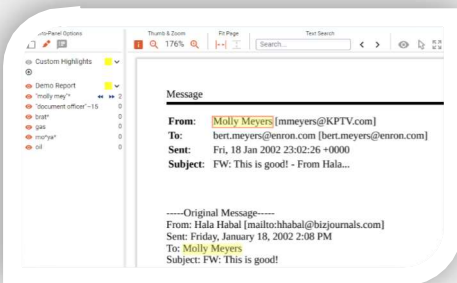

Search Term Reports

The built in Report functionality enables you to quickly get an overview on your documents at hand. Results can automatically be tagged and enabled for highlighting in the viewer for better visibility and navigation within documents.
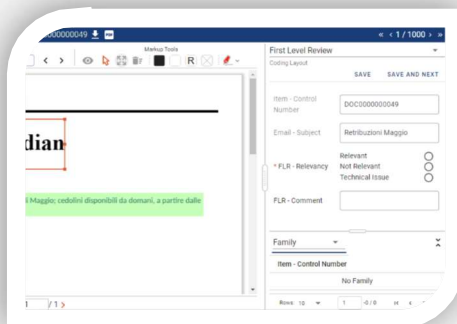

Folder and Tag Navigation

Navigate through your documents using Folders or Tag Trees to quickly drill down using specific locations or given criteria matching your documents.
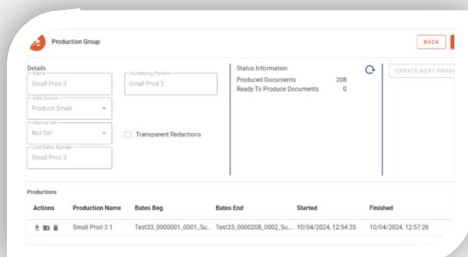

Highlights and Redactions

Control confidential information with redactions, highlight important facts and add your thoughts directly for others to see. Navigate to important findings with one click. Manage your Redaction Workflow with "Concur", our engine for redaction approval.

Review and Tag

Save relevant notes and classify documents. Farsight allows multiple layouts with completely customizable fields for different users and groups.
Get insight into Threads or Family relations using the relational items pane.

Productions and Sharing

Create flexible productions according to best practices. Farsight supports concordance loadfile productions compatible with other eDiscovery platforms. Easily share produced documents after approval directly from within Farsight.

Instant Performance

Fast and reactive Frontend

Reviewers and Administrators potentially spend weeks or months on a complex matter. The waiting time for a response from your platform quickly adds up, even if it is only about seconds each time.

Time is of the essence though in most cases and especially with external resources, this can significantly increase the cost of the entire project.

With smart caching and the use of modern UX technology, we were able to reduce waiting times to a bare minimum, increasing productivity even further.

The only downside: We can't give you an excuse for coffee breaks anymore.
