UNIFY
Collaborate

UNIFY Collaborate meets the demands of growing digital investigations, enhancing efficiency and security. It enables real-time collaboration, allowing multiple investigators to work on the same case simultaneously. By centralizing evidence and safeguarding the chain of custody, it eliminates potential security issues caused by storing evidence on removable media. Robust access control and detailed logging ensure only authorized users can manage data, maintaining full compliance.

> **Boost investigator collaboration**

> **Enable efficient data storage**

Key Benefits

Real-time collaboration
Multiple users can work in the same case at the same time.

Centralization of evidential data
All data is stored in one or more central places and made available to users via a single point of entry.

Access control and auditing
Roles and permissions dictate which users can do what in which cases.

Safeguarding of chain of custody
Seamless uploads from XRY, MSAB Kiosk, and Tablets. No more USB sticks.

Time and resource efficient
Permissions are set automatically based on user input or pre-set rules.

Cost saving data storage
Multiple backend storage providers and tiers can be used. Immutable exhibit data with rollback support.

Fully featured review tool
Review and analyze data with XAMN Pro and benefit from tailored views for different types of data, CSAM grading support, and top-tier audio/video codec support.

Powerful reporting
Use Report Builder to effortlessly create reports based on customized templates. Redact sensitive informaion.

Flexible deployment options
Can be installed and run on on-premise hardware or be deployed to Azure and AWS.

Local deployment

Recommendation for 10-50 concurrent users
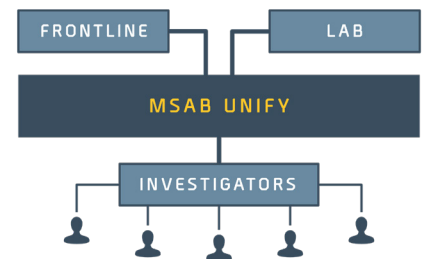

Non-containerized, Single-server
- Microsoft Windows Server 2016 or 2022
- Microsoft SQL Server 2022 (16)
- 4 VCPUs, 32GB RAM, Gigabit Ethernet
- Storage – Application files and DB: 100GB
- Storage – Case data: Direct attached or high throughput NAS/SAN with storage capacity based on data volumes extracted by customer

Azure/AWS deployment

See msab.com/unify for details on how MSAB UNIFY can be deployed in the cloud.
