MSAB Training Academy

XRY Certification Course

Know your tools and arm yourself with the skills to extract more data and solve more cases.

This three-day **comprehensive course** covers the latest techniques and best practices for **identifying, collecting, and preserving digital evidence** from mobile devices. Professionals at all levels of expertise will benefit from this expansive review of mobile device forensics along with advanced forensic techniques to help them get more data.

Why Get XRY Certified?

XRY is one of the best mobile data extraction solutions on the market. It's powerful, intuitive and efficient – just the tool you want (and need) when your investigations rely on the quality and speed of your extractions.

You'll get tool basics and verification techniques.

The course is designed to walk you through the incredible number of options and customizations to create an operational workflow that works the way you do.

Taking advantage of **XRY's full potential** is the best way to ensure you can **extract more high-quality data** faster and securely, while maintaining the integrity of the evidence.

Course Overview:

- Get comprehensive guidance on how to use XRY as part of your forensic investigation chain.
- Learn best practices to extract data logically and physically from various devices including SIM cards, memory cards, feature phones, and smartphones.
- Learn how to triage and Identify devices and specific device information through our pre-scan capabilities.
- Explore the numerous device, chip based and generic profiles to extract more data.
- Recover call history, chat messages, web browser history, email, contacts, database data and location information to build strong cases.
- Take a closer look at File Systems, examine how they handle data storage and deleted data.
- Explore Logical, Physical, and Full File System Extractions.
