

## Extend the Value of RelativityOne

Unlock more value from your data through new RelativityOne solutions. We have a set of five products for specific use cases that empower you to expand your offering and win new business. These solutions make it easy to tackle additional challenges while leveraging the functionality and security of the RelativityOne platform.

### Contracts

Increase the efficiency and accuracy of manual contract review projects by leveraging Contracts. With a robust viewer, powerful workflows, and AI, you can transform agreements into actionable, structured data – allowing you to make better decisions faster.

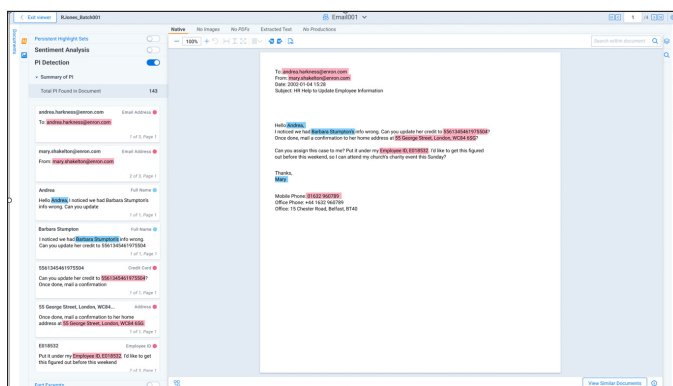

**40% reduction in contract review time and 50% project cost savings**

### Personal Information Detect

Go beyond traditional approaches to find and protect personal information with AI. With a combination of rules and machine learning, you can find PI quickly to increase productivity across a wide range of tasks.

**Cut PI document population for review by 50% and review the documents 5-6x faster**

### Data Breach Response

Leverage AI to find Personal Information (PI) and Protected Health Information (PHI) automatically, so you can easily build notification lists when responding to a data breach. Respond faster and more accurately to materially reduce costs and help meet notification deadlines.

**Leveraging AI in data breach response can cut assessment time by 75%**

The screenshot displays the Relativity Data Breach Response interface. It features a list of detected personal information items, including names, phone numbers, and email addresses. A detailed view of a specific item is shown on the right, highlighting the detected information and its context within the document.

### Translate

Easily translate large batches of documents or single documents on the fly into more than 100 languages, all from RelativityOne in just a few minutes. Minimize risk by avoiding having to send documents out for translation services.

**Reduce the time it takes to translate documents from days to minutes**
