Horizon/
SHADOWDRAGON

Your investigation's data.
# Any device. Any browser.
Anywhere.

When your investigations require speed and flexibility, you can't afford to be tied to a desk.

Horizon® is a purpose built link-analysis, investigative, and monitoring platform. Browser-based capability enables fast-paced, nimble investigations as you explore data or access our global OSINT collection infrastructure from the palm of your hand, Literally.
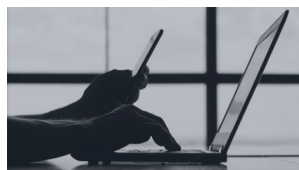

FEATURES

Purpose-built
for quickly creating manual graphs or exploring datasets through your browser

Leaner analysis
for unencumbered investigations and easy data storytelling

Secure storage
for encrypted data at rest and two-factor authentication

Full data access
to view complete details with live data sources

Flexible deployments
using cloud-based access

The best OSINT data, on your terms.

HORIZON IS USED BY/

- Intelligence Analysts
- Legal Professionals
- Detectives & Investigators
- Corporate Security
- Cyber Threat Intelligence Teams
- Background Investigators
- Insider Threat Teams
- Targeting Analysts

Integrate OSINT, deep web, dark web, and commercial sources through SocialNet®

Go beyond the profile to explore social networks and activity.

Horizon includes ShadowDragon's industry-leading SocialNet OSINT collection capability, providing near realtime access to 225+ social media, gaming, discussion, payment, and other platforms.

SocialNet captures online activities and social networking, maps accounts to aliases or other identifying information, and explores connections on live data to expedite your investigations and threat analysis.

COMBINE ADVANCED LINK ANALYSIS CAPABILITIES, INTELLIGENCE AND MONITORING

Connect, resolve, and verify social media aliases to personal identities

Widen scope of investigations by identifying social media associates

Discover and visualize networks of bad actors

Chart large and complex criminal operations

Uncover locations and infer movements

Enable robust data analytics

Utilize artifacts discovered to uncover lost assets and asset tracking

Use automotive search for identifying accounts for specific automotive brands

The good guys need the right tools to win.

US-based and dedicated to providing our allies with every advantage, we combine decades of in-the-field investigative experience with the bleeding-edge tactics and techniques to reduce the friction of sourcing, collecting, and sorting open source data.

Get started with a free demo and license.

Bring your own data to see how Horizon can speed up your investigations or put the world's most powerful data collection infrastructure in the palm of your hands through SocialNet. Schedule a free demo to start producing better, more focused investigations

SHADOWDRAGON

Getting answers is easy with the right software and data.
