Horizon Identity/

High-Fidelity Intelligence.
Instant Clarity.

Horizon Identity is ShadowDragon's powerful Intelligence module built to help investigators surface deep insights from overwhelming volumes of online data—fast.

Whether you're tackling fraud, tracking threats, or validating identities, Horizon Identity extracts online presence signals and behavioral indicators to give you the clearest possible picture of a person, group, or network—within seconds.
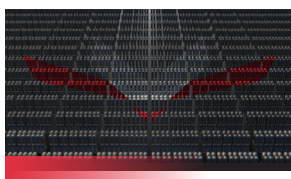

The Challenge

In a world flooded with fragmented data, uncovering the online presence of a person of interest is time-consuming, inconsistent, and often incomplete. Investigators waste hours manually searching across platforms, piecing together identity signals with little confidence in accuracy or depth.

The Solution

Horizon Identity accelerates identity resolution by extracting, analyzing, and summarizing vast amounts of online data into concise, decision-ready intelligence. It surfaces the hidden patterns, connections, and behavioral markers that define a target's online presence —so your team can act faster with greater clarity.

Why Horizon Identity

Speed & Scale

Build detailed profiles in seconds, not hours. No deep manual dives required—let the tool do the heavy lifting across hundreds of data sources.

Clarity from Chaos

Transform noisy, unstructured data into clear insights. Horizon Identity cuts through the clutter to give you what matters.

Built for Investigators

Empower analysts and frontline teams to focus on decision-making, not data wrangling. Seamlessly integrates with the Horizon platform for full-scope investigations.

Simplified insights made easy.

Key Capabilities

Automated Identity Profiling

Rapidly generate full-spectrum digital profiles using OSINT signals and behavioral indicators.

Cross-Platform Signal Extraction

Identify usernames, aliases, emails, and linked accounts across social, forums, and deep web sources.

Real-Time Insight Summaries

Convert complex data relationships into visual summaries for faster decision-making.

Modular Deployment

Use as a feature or as part of the larger Horizon ecosystem alongside Investigate and Monitor.

Trusted By

Analysts and investigators in over 30 countries. Used in Fortune 500s, federal agencies, and global investigations where accuracy and speed are critical.

Social media investigations don't have to be hard. SocialNet exists so the good guys win and the bad guys lose.

IDEAL FOR/

_Threat Intelligence Teams

_Fraud and Risk Analysts

_Law Enforcement & Homeland Security

_Corporate Security & Insider Threat Teams

_Investigative Journalists and Compliance Officers

Get started with a free demo and license.

Go beyond the profile. Schedule a free demo and see what ShadowDragon® can do for your investigations.

The good guys need the right tools to win.

U.S.-based and dedicated to providing our allies with every advantage, we combine decades of in-the-field investigative experience with the bleeding-edge tactics and techniques to reduce the friction of sourcing, collecting, and sorting open source data.

Our stuff works with your stuff.

Many of our tools are built with RESTful APIs and to integrate with today's leading investigative and data platforms. We even have utilities to free your own data and make it more usable across platforms.

SHADOWDRAGON

Getting answers is easy with the right software and data.
